

Planning for the Future

Planning for a better, more promising and exciting future needs a clear vision. Yet vision needs an effective plan of action to take you to where you want to be. A vision without a plan of action is a daydream; while it may be enjoyable, it is a waste of time. On the other hand, action without vision is a nightmare; it is like walking scared in a dark night and hoping for good luck. Life without vision defined in achievable goals is an aimless process leading to nowhere. Therefore, a vision needs to be clear and have a plan of action to realize it; and a plan of action needs a clear vision to define its goals and guide its movement to reach the desired objectives. No matter what you intend to do in life; there is a need to know three basic things;

Where you are at the time of planning; where you want to be at the end of your journey; and how to get from where you are to where you want to be.
